

IOWA'S WATER QUALITY: A Public Health Perspective

Public health is increasingly called upon to understand and speak to water quality issues nationally and in Iowa. This workshop will establish a foundation for a public health perspective on water quality.

Target audience: public and environmental health officials, laboratory professionals, water utilities and water operators, drinking water and water quality advocates, municipalities and legislators

This *interactive workshop* will include presentations and panels Q&A (see agenda next page).

Thank you for our sponsors for investing in this convening!
